

CATCH Intelligence Lumira 1.x

Course Description

This one-day instructor-led course is designed to take you through a step-by-step process to create a basic Lumira document and then explore the components that make up that process.

During this course, you will learn how to produce Lumira documents and compose a story around data with a hands-on approach using exercises throughout the course. Focus centers on the options available in preparing data and creating visualizations needed to compose your Lumira story.

After taking this course, you will be able to use Lumira to explore your data and build powerful data visualizations. You will be able to tell your data story by combining your visualizations into storyboards share your analysis with other users.

Course Audience

The target audience for this course is report designers who need to access, analyze and present information using Lumira.

Prerequisite Education

None

Additional Education

Not applicable for this offering.
