

SAP CLOUD ANALYTICS

FAQ

SAP ANALYTICS CLOUD:

- A single solution for Business Intelligence, Budgeting, Planning, Forecasting and Predictive
- Save time and reduce errors by not having to jump between products
- LIVE connection to your existing on premise universes providing one source of the truth
- Access all your data, SAP, non-SAP, on-premise and in the cloud
- Big Data Wrangling and data blending to enrich traditional analytics

What is SAP Analytics Cloud?

SAP Analytics Cloud is a new generation of Software-as-a-Service (SaaS) that redefines analytics in the Cloud by providing BI, predictive, and planning capabilities in one solution. Built natively on the SAP HANA Cloud Platform, it allows customers to simplify access to a new public cloud experience that they can trust.

Why is a new public cloud analytics product being offered?

A growing number of organizations are looking for public cloud analytics solutions that can be quickly implemented without the need for manual upgrades and migrations.

Is SAP Analytics Cloud built on the SAP HANA Enterprise Cloud (HEC) or SAP HANA Cloud Platform (HCP)?

SAP Analytics Cloud is built natively on the SAP HANA Cloud Platform.

What are the on-premise and cloud data sources that can be connected to SAP Analytics Cloud?

Yes. SAP Analytics Cloud replaces SAP Lumira, cloud edition, which was retired in 2016. Paid subscriptions will be transitioned to SAP Analytics Cloud.

Is my data secure within SAP Analytics Cloud?

SAP Analytics Cloud runs exclusively on SAP Cloud Platform, which meets international security standards.

Can SAP Analytics Cloud be deployed on-premise?

No. Customers who want to deploy analytics on-premise should focus on the portfolio of on-premise analytics solutions. Customers who want to access on-premise data sources can leverage the hybrid data access architecture in SAP Analytics Cloud and gain the benefits of software-as-a-service without having to move their data to the cloud.

Is the SAP BusinessObjects BI Solution impacted?

Not at all. Many customers still use on-premise software such as BusinessObjects. Eventually all organizations will need a combination of on-premise and cloud deployments. CATCH Intelligence can help you build the bridge between on-premise and cloud solutions so that data can be consumed wherever is best for your organization.

What is the pricing and licensing model for SAP Analytics Cloud?

SAP Analytics Cloud is available on a subscription basis. Customers will be able to license all capabilities or a subset, e.g., BI only or planning only.

Does SAP Analytics Cloud change the roadmap for SAP BusinessObjects BI Solution?

No, it does not. SAP BusinessObjects BI solutions continue to evolve with a strong set of on-premise innovations.

Is there a mobile app, and is it included in the subscription price?

Yes. The mobile app is available to all subscriptions for all editions: BI, planning, and predictive.

How can I learn more if SAP Analytics Cloud is right for my organization?

CATCH Intelligence is an SAP Partner. With full understanding that data analytics and business intelligence are more than a tool, CATCH can help you build a strategic plan so you can take your analytics to the next level by making well-informed decisions and gaining greater insight into your data.
