

## Advanced Web Intelligence 4.x Report Design

### Course Description

Web Intelligence is a query, reporting and analysis tool that allows you to access the data in your corporate databases directly from within SAP BusinessObjects Business Intelligence (BI) Launch Pad and to present and analyze this information in a Web Intelligence document.

This one-day instructor-led classroom course is designed to give you the comprehensive skills needed to apply alternative query and reporting techniques when creating complex Web Intelligence documents. After completing this course, you will be able to create combined queries and use sub-queries. You will also be able to use character and date string functions, create variables using "If" logic, and redefine calculation contexts.

### Course Audience

The target audience for this course is report designers who are experienced Web Intelligence users and who need to create complex Web Intelligence documents.

### Prerequisite Education

To be successful, you must have attended the following offering or have the equivalent knowledge of:

- SAP BusinessObjects Web Intelligence 4.0: Report Design.

### Additional Education

Not applicable for this offering.

### Prerequisite Knowledge/Experience

To be successful, you must have working knowledge of:

- Experience designing Web Intelligence reports.

### Level, Delivery, and Duration

This advanced-level, instructor-led offering is a one-day course.

### Applicable Certification

Not applicable for this offering.

## Course Topics

### Advanced Query Techniques

- Combining Queries
  - Combined Queries
  - Subqueries
  - Query on Query
- Other Query Features
  - Prompt Properties
  - Scope of Analysis
  - Query Properties

### Other Reporting Features

- Break and Crosstab Formatting
- Overriding Filters and Ranking
- Using Running Aggregate Functions
- Drill Filters and Widgets

### Character and Date Functions

- Character Functions
- Date Functions

### Using If Logic

- Using If to Create Groups
- Using If to Change Calculations

### Calculation Context

### Reporting Properties

- Document Summary and Properties
- Report Format/Properties
- Block Properties
- Cell Properties
